

Test 2 Review

2-factor theory of emotion
acronym
acrostic
algorithm
backward conditioning
basic emotions
blocked response
category search model
chunks and chunking
classical conditioning
cognitive mediation theory of emotion
common sense theory of emotion
confabulation
consolidation
continuous reinforcement
CR
CS
distributed practice
drives
Ebbinghaus
echoic memory
elaboration mnemonic
emblem
episodic memory
everyday memory
expressions
extinction
feature comparison model
fictions
fixed interval
fixed ratio
forward conditioning
functional fixedness
gestures
heuristic
hippocampus
iconic memory
insight
inter-stimulus interval
James-Lange theory of emotion
latent inhibition
link and story
long-term memory
massed practice
mental images
method of loci
micro-expressions

naive mnemonic
negative punishment
negative reinforcement
nominal, ordinal, interval and ratio
operant
Pavlov
peg-word system
positive punishment
positive reinforcement
practical memory
procedural memory
prospective memory
punishment
reduction mnemonic
reflex
rehearsal
schedules of reinforcement
schema
script
semantic memory
semantic network model
sensory memory
shaping
short-term memory
simultaneous conditioning
Skinner
spreading activation model
stimulus generalization
theories of emotion
translation schemes
UCR
UCS
variable interval
variable ratio
viso-spatial sketchpad
Watson
working memory
